

Matthew Neuffer

XR Specialist | Spatial Computing and Interactive Development

Boston, MA | 908-914-2894 | matthewneuffer@gmail.com
matthewneuffer.com | linkedin.com/in/matthewneuffer

SUMMARY

Develops VR, AR, and mixed reality applications in Unreal Engine 5, Unity, and OpenXR. Integrates immersive experiences with new and existing platforms, including custom-built systems, through APIs and cloud services.

EXPERIENCE

ProtoGen Inc.

Remote

XR Specialist

Mar 2025 - Present

- Develop Electrician Virtual Training Lab in Unreal Engine 5 and OpenXR, delivering high-fidelity VR simulations of hazard mitigation and safety procedures on Meta Quest.
- Optimize CPU/GPU performance across desktop and Meta Quest 3 mobile hardware, extending a shared codebase to support VR and mixed reality.
- Engineered a learning management system for content delivery and trainee performance review; integrated VR applications through custom APIs and LMS/LRS connections.

The Global Lab at WPI

Worcester, MA

XR Specialist

Oct 2024 - Aug 2025

- Built an interactive VR data visualization in Unity, translating AI environmental impact data into a 3D experience for non-technical audiences.
- Researched VR/MR hardware and SDKs to guide lab development; shared XR resources with students and faculty.

Robert Corio Designs

Providence, RI

Web/3D Designer & Technology Developer

Jun 2023 - Aug 2024

- Prototyped hardware-software integrations to display 3D jewelry assets on Looking Glass holographic displays.
- Built an online jewelry configurator, three brand websites, and real-time 3D ring visualization with WebGL.
- Developed an interactive render database with user-facing search, reducing render turnaround time by 75%.

WingLee Creative

Hitchin, United Kingdom

AR/Design Intern

Jul 2018 - Aug 2018

- Developed augmented reality marketing solutions for client campaigns.

SELECTED PROJECTS

Custom VR Framework and Development Pipelines

Claude Code, Codex

- Built VR and learning development pipelines with Claude Code and Codex, plus custom framework extensions.
- Built a custom WebXR packaging pipeline that improves CPU/GPU performance and enables the maximum supported refresh rate on Meta Quest 3.

SPI-Glass

Unity, Niantic Lightship ARDK

- Engineered multiplayer AR storytelling and gameplay systems with UI and real-time networked interactions.

Ask me about: MR Golf Simulator; Anduril EagleEye Clone; MR Microgrid Planner; Buffalo Trace / Warehouse H Tour Demo; Blair AR Tour; Conserve Africa.

TECHNICAL SKILLS

XR development: Unity, Unreal Engine 5, OpenXR, WebXR, Apple Xcode, Reality Composer

Programming and AI tools: C++, C, Java, Python, SQL; Claude Code, Codex

Cloud and APIs: AWS, Cloudflare, Railway; custom APIs, LMS/LRS integration, Stripe API

Platforms: Meta Quest 3, Apple Vision Pro, desktop, Android, iOS

Interactive systems: TouchDesigner, full-stack development, Agile, UI/UX, 3D modeling

EDUCATION

Worcester Polytechnic Institute

May 2025

Bachelor of Science in Interactive Media and Game Design | Dean's List
