EXPERIENCE

Global Labs, WPI

Worcester, MA

XR Specialist

October 2024 – Present

- Researched and integrated cutting-edge VR/MR technologies to enhance immersive user experiences.
- Developed a VR data visualization tool depicting the environmental impact of AI systems, simplifying complex data for broad audiences.
- Curated AR/VR/MR resources, empowering students to create innovative applications.

Robert Corio Designs

Providence, RI

Technology Developer

May 2024 – August 2024

- Spearheaded the design of an online jewelry configurator, increasing user engagement and lead-to-sale conversions.
- Created a searchable interactive render portal, reducing production time by 75% and enhancing customer satisfaction.
- Improved internal processes with optimized render tools, facilitating better client outcomes.

Robert Corio Designs

Providence, RI

Web Designer, 3D Designer and Retail Associate

June 2023 – August 2023

- Designed and developed three custom websites, boosting brand visibility and functionality.
- Implemented a WebGL-based ring visualization tool, enhancing customer purchasing confidence.
- Researched and prototyped a holographic display system for custom ring previews.

WingLee Creative

Hitchin, UK

Augmented Reality and Design Intern

July 2018 – August 2018

- Collaborated with a design team to deliver innovative marketing solutions integrating AR technology.
- Explored AR applications in client branding and marketing strategies.

PROJECTS

Conserve aRica (Unity Engine, Vuforia SDK)

- Developed an interactive AR scavenger hunt to promote conservation awareness through engaging 3D content and gamified exploration.
- Created seamless app integration, allowing users to discover, learn, and compete for prizes.

Blair AR Tour (Unity Engine, Vuforia SDK)

- Designed a 3D augmented reality tour showcasing architectural features of Blair Academy's newest building.
- Delivered both an interactive overview and room-specific insights to prospective students and stakeholders.

SPI-Glass (Unity Engine, Niantic Lightship)

- Led the development of an AR game combining spatial computing and interactive storytelling.
- Designed gameplay systems, UI components, and real-time interactions.

Winter Wonderland (Event Planning and Management)

- Managed a \$30,000 budget to host a campus-wide event featuring an ice rink, entertainment, and dining options, demonstrating leadership and logistical skills.

EDUCATION

Worcester Polytechnic Institute

Worcester, MA

B.S., Interactive Media and Game Design

2021 – 2025

- Leadership Roles: ATQ Vice President & Secretary, IFC Director of Marketing

Technical Skills

Technical: Unity Engine, Blender, Adobe Creative Suite, Maya, WebGL, SQL, Python, C++, Java, Tableau, UX/UI Design

Product Management: Data analysis, user research, roadmaps, prototyping, stakeholder communication
